

## Odoo implementation

The implementation includes a package of premium services by a dedicated consultant. During the implementation phase, you will have an Odoo Project Manager assigned to you to analyze your requirements and configure your Odoo Apps according to your needs. The consultant will also train you on how to use the Odoo Apps, coach you on how you can use Odoo's functions and features to grow your business. Our consultants will do their best efforts to help you get started with Odoo within that time.

### **1. Dedicated customer consultant**

Before implementation, our consultant will analyze the way your business runs and suggest the best way to use Odoo. We will handle all configuration and coach you on how to use Odoo. This service is organized through planned sessions (over the telephone or online) where our consultant will carry out a more in-depth analysis of your needs to see what can be improved in line with the existing functional possibilities of the official Odoo Apps. We will provide you training material so that you are always able to use the latest version of Odoo Apps.
