Integrated Workflow

A comprehensive library of 2000+ resizable designs that can be edited using our drag & drop smart drafting or full CAD Design tools.

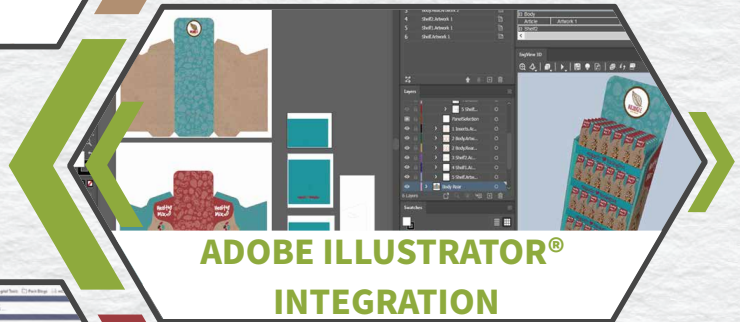

ENGVIEW LIBRARY

Designs can be viewed in full color 3D models with tools to animate the folding and unfolding process.

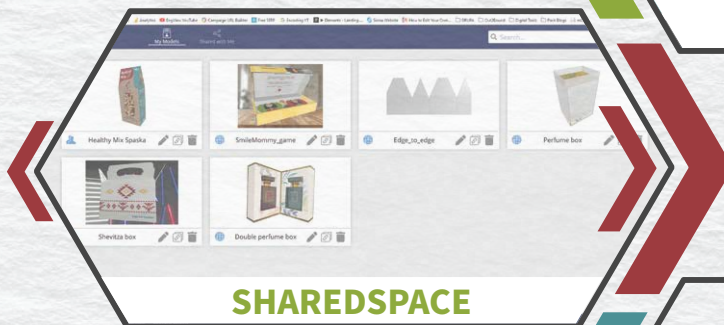

3D VISUALIZATION

Work in Adobe Illustrator® and have the artwork applied over the 3D structure simultaneously. Create variants of the design, add finishing effects and see them on the 3D model

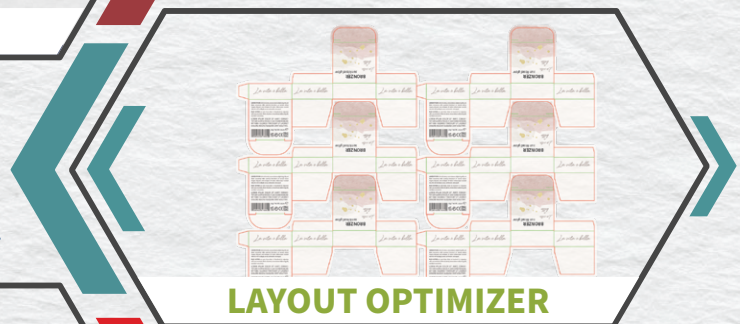

**ADOBE ILLUSTRATOR®
INTEGRATION**

Share live full color 3D designs in the cloud that can be viewed with a browser. Allows for the project team to approve designs prior to production.

SHAREDSPACE

Automatic nesting, sheet layout and registration marks save time & minimize waste. Advanced tools in Adobe Illustrator automatically create bleed offset and crop images.

LAYOUT OPTIMIZER

CAM module creates & optimizes cutting path, tool order and creates a machine ready cutting file.
